

www.hpnboost.com simulation and prognosis

We – a international operating and privately owned research-company – working on simulation and prognosis, plan to leverage our business-platform. We own a decent portfolio of highly-innovative products and intend to perform on our latest research and development results.

Anticipating expected major growth the coming years, we plan to position ourselves in a way, that we are able to cope long-term with upcoming market-needs.

colleagues (m/f) data-warehousing and programming validation of simulation: monte-carlo-simulation, oracle-databases

your job:

- Interfacing between IT-technology and economics.
- Transform defined parameter and variables in database-elements, able to cope with requirements of our simulation. Goal is to improve in a constantly manner our learning models during upcoming validation-runs.
- Prepare data -even from home or from starbucks'-coffe-shops- from Monday to Friday. Daily effort between 2-3 hours. This will take most probably 3-4 months. After realizing success, there ist the chance on a long-term assignment as a Junior-Scientist.

your qualification:

- Finalized education as IT-clerk/-administrator with focus on database-oriented applications.
- Further studies in economics welcome.
- Proofen German and English and the will to travel a little.

Do you look for a new and long-term challenge in a dynamic landscape with extraordinary development-potential?

We are looking forward to your application. Please specify, when you are able to start and your expectations in terms of salary. For further questions, please contact Mr. Gerald Häge. We will treat contact confidential.
